

Code compliance doesn't have to be complicated.

2012 IRC R501.3 has made code compliance more difficult for builders using Engineered Lumber, but **onCENTER® AFL** (Advanced Framing Lumber) is a simple solution that doesn't require the additional costs of fire sprinklers, drywall, or chemical applications. In fact, it offers all the benefits of engineered lumber, yet installs just like dimension lumber. How can code compliance be any easier?
