

# Having a **hard** time pressing your plates?

Embedding plates into some engineered wood truss chord alternatives is like **pressing into brick**.

## A BETTER OPTION

### Try onCENTER® AFL for your truss chords

- *Manufactured with Black Spruce (easier to press than composite lumber)*
- *Straight and strong with wane-free edges*
- *1.6E, 1.7E, 1.9E, and 2.1E grades*
- *Depths up to 16" (easy to match attic floor depths to I-joists)*
- *Lengths up to 32' (save on labor and plate costs)*
- *Design values available in most truss design software*
